CAREER OBJECTIVE

Data Scientist with a background in mathematics and 6 years of professional experience in teaching, transitioned into data science and currently working as a Data Scientist in the maritime industry. Experienced in building end-to-end data solutions, including machine learning models, time series analysis, and AI-powered applications, as well as delivering business intelligence and financial reporting. Proven ability to turn data into actionable insights through real-world projects, competitions, and industry experience. Focused on building scalable and business-oriented data solutions.

SKILLS

- **Programming Languages:** Python, SQL
- **Development Environments:** Jupyter Notebook, PyCharm, VS Code, Google Colab, Coder (Cloud-based IDE with Docker support)
- **Libraries and Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn, XGBoost, LightGBM, Statsmodels, TensorFlow, Keras
- **Data Analysis and Modeling:** Exploratory Data Analysis (EDA), Feature Engineering, Data Cleaning and Preprocessing, Classification, Regression, Clustering, CRM Data Analysis
- **Machine Learning & AI:** Machine Learning, Deep Learning, Model Evaluation, Prompt Engineering, LLM Integration, AI-Assisted Development (Claude, Claude Code)
- **Data Engineering & Systems:** API Development, Django, Vector Search, Embeddings, Retrieval-Augmented Generation (RAG)
- **Time Series:** Time Series Modeling, SARIMAX, Forecasting
- **Data Applications:** Streamlit, Interactive Data Applications, End-to-End Data Workflows
- **ERP & Financial Reporting:** ERP Systems, Managerial Finance Dashboards, Data Reporting, Sustainability Reporting
- **BI & Visualization:** Power BI, Tableau
- **Tools:** GitHub, Bitbucket, Microsoft 365, Claude, Claude Code
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Teamwork

LANGUAGE

- **English:** Intermediate, Strong in reading and technical documentation

EDUCATION

Marmara University, Faculty of Science, Mathematics, **2010 - 2014**

EXPERIENCE

LCM Rota Denizcilik, Data Scientist, **Apr 2026 - Present**
Leading company-wide data reporting and analytics, transforming operational and financial data into actionable insights for management. Designing and building managerial finance dashboards within the ERP system to support data-driven executive decision-making. Serving as the primary liaison with the ERP vendor, managing data flows, reporting requirements, and ongoing development processes. Driving the company's sustainability efforts through data analysis, currently developing a corporate sustainability report based on 2024 and 2025 data.

MORVOI AI-Powered Parenting Assistant, Data Scientist (Project-Based), **Jan 2026 - Sep 2026**
Developed a Retrieval-Augmented Generation (RAG) system for context-aware question answering using blog-based content. Built the backend architecture including embeddings, vector search, and a Django-based API to enable end-to-end interactions. Integrated a large language model (Google Gemini) to generate intelligent, context-aware responses. Implemented safety mechanisms such as content filtering and prompt injection protection, and established monitoring and performance tracking systems.

Sahibinden.com, Junior Data Scientist, **Mar 2025 - May 2025**
Analyzed the relationship between digital engagement metrics and weather conditions. Developed time series models (SARIMAX) by integrating user behavior data with external variables. Generated insights to support business decision-making and delivered findings through a comprehensive technical presentation to stakeholders.

YenidenBiz Association, Volunteer Data Analyst, **Jan 2025 - Present**
Leading data-related initiatives to support projects focused on women's return to the workforce. Actively involved in the migration and restructuring of the existing data infrastructure, contributing to building a more scalable and efficient data environment. Improved data accessibility and usability for ongoing projects.

AI for Life Sciences Groundwater Prediction Project, Data Scientist (Competition), **Jun 2024 - Oct 2024**
Developed predictive models to estimate groundwater levels using historical data and environmental variables. Identified key external factors such as weather conditions, precipitation, and temperature affecting groundwater changes. Performed data analysis and modeling

using Python-based tools and evaluated model performance using SMAPE. Contributed to a team project that **ranked 3rd** in an international competition organized in collaboration with the University of Vienna.

Women in Datathon Data Science Project, Data Scientist (Competition), **Mar 2024**
Developed data-driven models to analyze the impact of women's labor force participation, health, gender roles, and political representation on wage inequality. Built regression models to identify key factors influencing employment and income disparities. Generated actionable insights from the data and contributed to a team-based project that achieved **1st place** among all participants.

Mathematics Teacher, **2014 - 2020**
Worked at well-established private education institutions including Uğur Schools, Fen Bilimleri Schools, and Era Colleges. Delivered structured mathematics education to high school students, adapting teaching methods to diverse learning needs and performance levels. Strengthened analytical thinking, problem-solving, and communication skills through continuous engagement with students. Designed outcome-oriented lesson plans and managed classroom dynamics effectively.

AWARDS

1st Place - UP School & Bitexen Women in Datathon, 2024
3rd Place - AI for Life Sciences - Gradient Zero & University of Vienna, 2024

CERTIFICATIONS

- Applied Microsoft Power BI, BTK Academy, **Oct 2024**
- Deep Learning, Turkcell Geleceği Yazanlar, **Aug 2024**
- Time Series, Miuul, **Jul 2024**
- Data Science Expertise Certificate, Istanbul Kodluyor Project, **May 2024**
- Data Analytics Essentials, Cisco Networking Academy, **May 2024**
- Introduction to Data Science, Cisco Networking Academy, **May 2024**
- Data Science Bootcamp, Miuul, **May 2024**
- Data Science Specialization, Ecodation, **Nov 2023 – Feb 2024**
- Data Engineering Bootcamp, Tech Istanbul – Istanbul Metropolitan Municipality, **Apr 2023 – Aug 2023**
